PolyBagger

general information

Would you also like to decrease your polybag packaging costs? Greefa has the answer!

The semi automatic polybagger has been designed to improve the efficiency of your sorting and packing line. The unit will significantly improve packing speeds as opposed to manual bagging at a small investment.

Flexibility

- ✿ Stand alone unit
- ✿ Can easily be added to existing sorting machine
- ✿ Can be placed and taken away flexibly
- ✿ Can be added to existing packing belts
- ✿ Single or double version
- ✿ Adjustable angles

Placement

- ✿ Several at one return belt
- ✿ Directly at the outlet belt
- ✿ On existing accumulation belts
- ✿ On a dedicated packing line
- ✿ Directed by the sorting machine

Advantages

- ✿ Small investment
- ✿ Delicate soft fruit handling
- ✿ Lower costs per kg
- ✿ Also suitable for smaller volumes

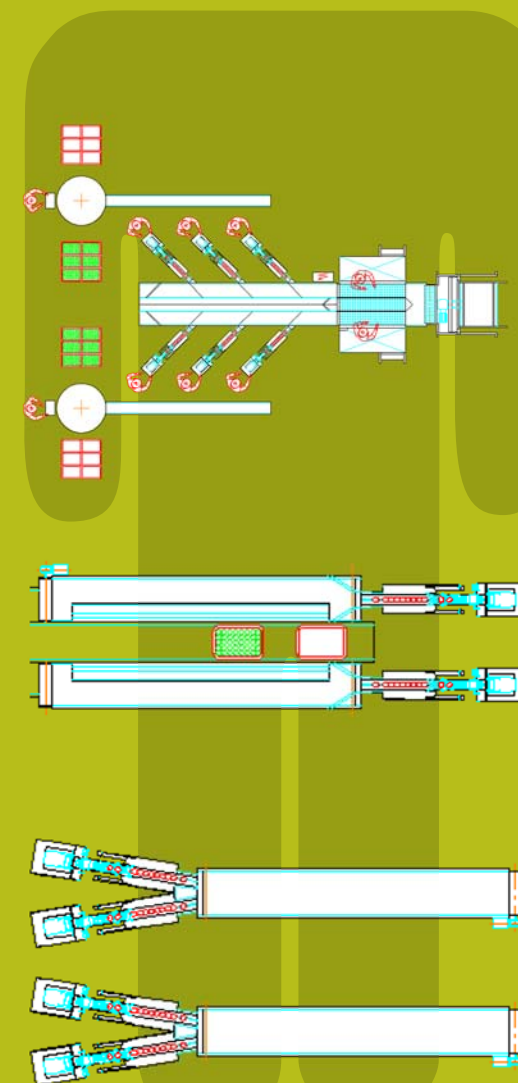

What does it do?

Greefa's semi automatic PolyBagger counts the fruits into a bag. Once the necessary fruits have been filled, an optical signal is given and the operator can take away the bag. The bagging unit then automatically opens a new bag to be filled.
